IN
THE
ENCHANTED COTTAGE

Many movies have deep spiritual content within them. These spiritual truths reveal important aspects of life. They also reveal many truths about human behavior and the sometimes sad situations we get ourselves into when we refuse to be authentic people.

Movies also teach us the importance of hope, faith and love in our everyday lives. Films help us to see ourselves in many of the characters, and so we learn that many of the joys and sufferings we experience are situations that we actually share with many others in this world. We are certainly never alone in the many things we suffer.

This series will focus on several films that contain important spiritual inner-messages and reveal a great deal about functional vs. dysfunctional behavior. After viewing the films, we will discuss the importance of the underlying messages and relate them directly to our own lives.

The cost is \$35 for the entire series. Program runs from 9:30 AM- Noon.
